I've got the hankering for some lead! I know there has been a decline in the FUN factor of this game but lets enjoy it for what it is, a game. Join me on the gamegrid and lets have some fun again. Timbo ASE14 To get your ASE number and logo template contact me (have a look at the properties of my name and work out what ya gotta remove!) BTW Muddy already got ASE1 and ERK from memory booked ASE69

Oh ho, we have a new comer! Well as things go, we do not use servers other than one of the people who is on during the night. In the past we have had too many hackers and also 13 yo kids being a pain in the ass on public servers. However Mister Grech, I will forward an ICQ number and we shall have a chat sometime. Perhaps of you pass muster you may join the ASE door kicking squad. Cheers Muds.

Oh ho, we have a new comer! I think I asked before, and was told, but did nothing... What do I need to kick some ass? software? server or something to point to? cannon fodder? (oh, you guys will do ;o) cheers, Andrew. (who hasn't played computer games for a couple of years now)

Dear Sniper, Sorry to bother you, whilst you dial in your new AWM, but I think I asked before, and was told, but did nothing... What do I need to kick some ass? (Some big boots and a willing donkey...I mean ass?) software? (it helps)

---

server or something to point to? (Point a weapon at me and expect to have your spleen and a few vertebrae handed to you!) cannon fodder? (oh, you guys will do ;o) (Pah if I had ten bucks every time I heard some jumped up little terrorist threaten my bodily functions, I would not be writing columns for cheap ass magazines.) cheers, (That should read, libations at the foot of your altar oh mighty one and 13 Vestial virgins offered.) Andrew. (Aka, I never saw it coming.) (who hasn't played computer games for a couple of years now) (Aha, the usual way out if he plays bad....I have the patent on the lag and ping complaints too, especially when playing an 11 year old named Michael who kicks my butt, damn internet capable little people.) Dear Andrew, Well, you have decided that you want to become a bullet sponge, good for you! To play Counter Strike, you need a number of things. 1) A copy of half life, which you can buy off the net dirt cheap or from a video entertainment medium outlet. 2) A computer, I believe something above a P1200. 3) An internet connection, cable is preferable, however dial up will do (damn you big phone companies hurry up and lay some lines about the Snipers Nest.) 4) A copy of Counter Strike which can be downloaded in it's current format (v 1.3) from this site and others. <http://www.counter-strike.net/downloads.html> 5) A willingness to die a meaningless death, for a forgotten cause in exotic locations and a hair trigger. May I suggest that you join the vaunted ASE Troll Patrol and their CS unit the Door Kickers. Follow these steps and you should be well on your way to a life of heroism or crushing defeat. Somewhat fondly whilst your in my sights, The Sniper.

What do ya think ppl? CS Ladders here at Wireplay The CS Ladder is now open for signups! Starting in 2-3 weeks time, we are giving the clans the chance to get their teams set up before the commencement of the ladder. As you are probably aware, we have been working pretty hard beta testing the Wireplay Ladder system with the DoD community here at wireplay for the end part of 2001. We have taken all the info and feedback from the DoD community, to make the Wireplay Ladders one of the best ladder systems available in the world today, with some impressive features not seen on any other ladder, no matter what country. The Wireplay CS Ladder will support the following: - Support for more than 100 clans - 10 games can be played at any one time - HLTV spectating automatically in every game - Full clan profiling, clan scores will remain after any season - Automated Server creation (all you do is play!) - Easy challenge interface. Currently the ladder is now accepting signups so that teams can get all their members set up in the system ready to go. The ladders are in a locked state, which means your free to join the ladder, and add your team members however you will not be challenged until the ladder is released. Signing up your team is easy. Each member of your team will need either a Wireplay profile or an AusGamers username/password. You simply search for your member either by player nick or email address and click add. You can add a custom graphic, your teams url, and your teams email address to the profile page for your team. Remember, a player can only be in one team on the ladder, however a player playing for one team on the CS ladder can play for another team on the DoD ladder. A new list will be developed letting you know what games are coming up to spectate for all Wireplay ladders What are you waiting for, sign up for whats set to be Australia's largest ever online league that plans to be around for a long time to come

Damn is there a V2? Will have to check. Yeah it is different to CS in a few ways, but is really cool in it's own way too.  
Anyone for giving orders in German, cause this game does! Cheers Muds
